

PREFACE ix

CHAPTER 1

What Is Photography? 1

CHAPTER 2

What Is Light? 5

CHAPTER 3

The Camera—An Introduction 9

CHAPTER 4

Images: What Is Perspective? 15

CHAPTER 5

Why Does a Camera Need a Lens? 19

CHAPTER 6

Elementary Optics: How Do Lenses Work? 23

CHAPTER 7

The Simple Thin Lens and What It Does 27

CHAPTER 8

How to Make Lenses that Are Good Enough for Photography 31

CHAPTER 9

Coming to Terms with Real Camera Lenses 41

CHAPTER 10	
Fisheye Lenses and How They Capture the Whole Sky	49
CHAPTER 11	
What Is an Equivalent Image?	55
CHAPTER 12	
How to Get Very High Magnification	63
CHAPTER 13	
Do We Need Filters Anymore?	77
CHAPTER 14	
The Limits of Human Vision	89
CHAPTER 15	
How Can Color Be Managed?	95
CHAPTER 16	
Image Capture and Processing	113
CHAPTER 17	
What Is Perceived Image Quality?	125
CHAPTER 18	
The Creation and Appreciation of Art in Photography	137
APPENDIX A	
Historical Note on Enlargers	149
APPENDIX B	
What Is Behind the Rules of Optics?	151
APPENDIX C	
Derivation of the Lensmaker's Equation	155
APPENDIX D	
Gaussian Optics and the Principal Planes	157
APPENDIX E	
A Macro Lens with Attachments	159
APPENDIX F	
Capturing Photons with Photographic Film	161
APPENDIX G	
Microelectronics and the Path to Digital Sensors	167
APPENDIX H	
Irradiance and Illuminance Units	169
INDEX	181
