To my father, Y. H. Sung, and in memory of my mother, T. C. Chang; his words
and her care shaped my life
— K. S.

To my wife Danna
— S. B.

Contents

Preface	xiii
List of Tutorials	xix
Introduction	1
I Elements of Interactive Programs	7
Introduction to Part I	9
1 Event-Driven Programming	13
1.1 Control-Driven Programming	14
1.2 Event-Driven Programming	19
1.3 Triggering and Translation of Events	24
1.4 Categories of Events	27
1.5 Servicing of Events	30
1.6 The Event-Driven Ball-Shooting Program	32
1.7 Summary	35

2	Working with GUI APIs	37
2.1	Our Application and Existing Libraries	38
2.2	GUI Elements	39
2.3	Building a GUI Application	41
2.4	Examples: FLTK and MFC	43
2.5	Implementation Notes	45
2.6	Tutorials and Code Base	48
3	A Simple Graphics Program	75
3.1	Coordinate Positions and Vertices	77
3.2	A Computer Graphics Solution	79
3.3	Lessons Learned	84
3.4	Further Examples	85
4	Working with Graphics APIs	93
4.1	Relationship between Graphics and GUI APIs	95
4.2	Programming Graphics APIs	96
4.3	Understanding Tutorials 3.1 and 3.2	100
4.4	Abstraction of Graphics API	103
5	The Model-View-Controller Architecture	109
5.1	The Model-View-Controller Framework	110
5.2	Applying MVC to the Ball-Shooting Program	112
5.3	Expanding the Ball-Shooting Program	118
5.4	Interaction among the MVC Components	120
5.5	Applying the MVC Concept	121
5.6	Tutorials and Implementations	122
6	Applying to Real-World Applications	147
6.1	PowerPoint	147
6.2	Maya	149
II	Essential Concepts: Presented in 2D	153
	Introduction to Part II	155
7	Attributes and Behaviors of Primitives	157
7.1	Types of Primitives	158
7.2	Working with Color	162
7.3	Programming Geometric Primitives	163

7.4	Abstraction of Behavior: A Primitive Hierarchy	172
7.5	Collisions of Primitives	182
7.6	Collection of Primitives	188
8	Transformation Operators	193
8.1	The Translation Operator	194
8.2	The Scaling Operator	198
8.3	The Rotation Operator	204
8.4	Affine Transformations	209
8.5	Some Mathematics of the Transform Operators	210
8.6	Tutorials on Transformation Operators	215
9	Combining Transformation Operators	225
9.1	Concatenation of Operators	226
9.2	Inverse Transformation	229
9.3	Pivoted Transformations	231
9.4	Programming Transformations with Graphics APIs	236
10	Coordinate Systems	257
10.1	Understanding Tutorial 3.1	258
10.2	Device and Normalized Coordinate Systems	265
10.3	The World Coordinate System	266
10.4	The World Coordinate Window	273
10.5	Inverse Transformation	287
11	Hierarchical Modeling	293
11.1	Motivation	294
11.2	The SceneNode Class	299
11.3	Scene Trees and Scene Graphs	311
11.4	The Object Coordinate System	317
11.5	Simple Animation with the SceneNode Class	333
12	Making the Applications Interesting	337
12.1	Orientation of Objects	338
12.2	Alpha Blending and Transparency	345
12.3	File Texture Mapping	351

III	The Third Dimension	365
	Introduction to Part III	367
13	A Simple 3D Application	369
	13.1 3D Coordinate Systems	371
	13.2 The Model and the Scene	372
	13.3 A Computer Graphics Simulation	374
14	The Camera	379
	14.1 A Computer Graphics Camera	380
	14.2 The Visible Volume	386
	14.3 The Coordinate Transformation Pipeline	396
	14.4 The World Transform: OC to WC	397
	14.5 The Eye Transform: WC to EC	398
	14.6 The Projection Transform: EC to NDC	402
	14.7 3D NDC-to-2D Device Transform	404
	14.8 Re-Examining Tutorial 13.1	405
15	Working with the Camera	409
	15.1 UWBGL Camera Implementation	413
	15.2 Working with Multiple Cameras	422
	15.3 Manipulating the Camera	422
	15.4 DC-to-WC Transformation	436
	15.5 2D Versus 3D Coordinate Transformation Pipeline	444
16	Graphics Programming in 3D	447
	16.1 Graphical Primitives for the Third Dimension	448
	16.2 Rotation in 3D	457
	16.3 Orientation in 3D	464
	16.4 Simple Scene Graph in 3D	479
	16.5 Scene Graph and Orientation	480
	16.6 Collision in 3D	485
	16.7 Selection in 3D	487

A	Material and Illumination	489
B	Vectors	493
B.1	Vector Basics	493
B.2	Vector Products	498
B.3	Vector Examples	500
B.4	Orthonormal Matrices	505
C	Summary of Library Version Changes	507
	Index	537
